SPONSORS

OGE Energy Corp

Oklahoma Association for Environmental Education

Oklahoma Conservation Commission

Oklahoma Department of Agriculture—Forestry Services

Oklahoma Department of Environmental Quality

Phillips Petroleum Foundation

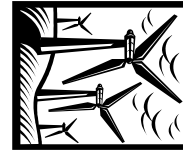

Sierra Club—Oklahoma Chapter

Please join the Oklahoma Association for Environmental Education at their annual Environmental Expo, Saturday, February 7, 2004, at the Tulsa Community College's Northeast Campus.

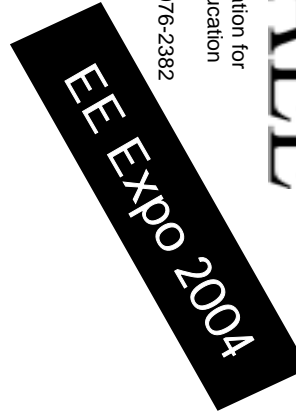

Participants at the 2004 Environmental Expo will:

- ◆ Learn about the environmental challenges facing Oklahoma
- ◆ Acknowledge the responsibility we have to protect and engage others in protecting our environment
- ◆ Hear how concerned citizens have "made a difference"
- ◆ Experience the success realized when motivation is added to education
- ◆ Rise to the challenge of helping those around us develop a stewardship ethic

Registration Questions?

Contact Jeanine Huss, OKAEE President, at 405.744.7233

Conference registrants are invited to attend OKAEE’s 2003 award presentations and reception at a special ceremony on Friday, February 6, from 6:30 p.m. to 8:00 p.m. at TCC’s Northeast Campus. Award nomination information, as well as updated conference info, can be found on the website: <www.okaee.org>.

“State of the State” — Miles Tolbert, State of Oklahoma, Secretary of Environment

Secretary Tolbert will provide a “kickoff” to our environmental expo that offers an overview of Oklahoma’s environmental issues with a slant toward the obstacles that citizens – as individuals or as a group – can address.

Secretary Tolbert’s performance in his present position, and in past positions, speaks for his interest in Oklahoma’s environment. He has been our Secretary for Environment for just over a year, and previously he was the Chief of the Environmental Protection Unit for the Oklahoma Attorney General’s Office.

“Taking Personal Action to Create A Sustainable Community” — Dr. William Hammond

Our keynote speaker, Dr. Bill Hammond, will share with us the ingredients for growing community members who have a sense of place, are ecologically literate, and have a vision of what a sustainable community looks and feels like. Belief in the “Power of One” comes from engagement and empowerment that grows when you first know that you can and do take conscious action to change yourself to be a more informed person who makes conscious responsible choices. Dr. Hammond will provide us with the success story of how Florida’s Lee County School’s Environmental Education Program has helped to foster people who are willing to make sacrifices and are committed to making a difference on this planet.

Dr. Hammond is a professor at Florida Gulf Coast University College of Arts and Sciences, and is one of the founding full-time faculty members. He is in the divisions of Ecological, Marine, and Interdisciplinary Studies. Dr. Hammond is also president of Natural Context Consulting. A good friend to environmental education in Oklahoma, Dr. Hammond has been a part of several past Environmental Expos and environmental education events in our state.

“Impacts on Oklahoma EE by National Organizations” — Updates from three Oklahomans involved in national initiatives: Christina Stallings, Education Coordinator for Forestry Services (Project Learning Tree/PLT); Gina Lagaly, Director of OK Kids in Environmental Education and originator of Eco-motion mobile EE program (North American Association for Environmental Education/NAAEE); and Suzanne Spradling, PhD, Dean of Education, St. Gregory’s College and Project Director of the Oklahoma Consortium for EE (Environmental Education Training and Partnerships/EETAP)

EXPO CONCURRENT SESSIONS

SESSION ONE: LOVING THE LAND

Sue Gray, Horticulturist, Tulsa Co. OSU Extension

People who love their natural resources will protect and conserve. Teaching people to love the land means helping them to know about the land over which they walk.

SESSION TWO: TEAM TIME

Bob Coffey, Public School Educator, Wyandotte, OK

Bob will cover the basics of incorporating a volunteer monitoring program in his school’s science curriculum, and he will emphasize how educators can find ways to teach natural resource stewardship to their students.

SESSION THREE: CARING IS NOT ENOUGH

Elizabeth Caniglia, PhD, Department of Sociology, OSU

Pro-environmental attitudes are not necessarily indicative of pro-environmental behavior. It takes more than “concern” to boost people into action. Beth will give us some exciting insights and suggestions on moving people to action!

SESSION FOUR: WHY WIND, WHY NOW?

David Branecky, OGE Energy Corp

OGE is taking important steps to use wind power. Attend this session to learn more about OGE’s philosophy concerning this positive move.
